Period fo	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

10/510,848 Art Unit: 1792

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 12, 13 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jp 3093695 in view of Takahiro (jp 03-075298).

The Jp 3093695 reference teaches a method of growing and a diamond structure note entire reference. On a substrate, a layer of diamond nucleation sites is prepared. The sites are orientated the same for the vapor growth, note figures. Then a layer of polycrystalline diamond is grown on the nucleation sites. The nucleation sites can be diamond, note abs. The orientation is of the polycrystalline layer. The sole difference between the instant claims and the prior art is nucleation sites being single crystal diamonds placed next to each other. However, the Takahiro reference teaches that large single crystal diamonds can be placed together to create a base for diamond

diamond has uniform orientation.

growth, note translated abs. It would have been obvious to one of ordinary skill in the art to modify the Jp 3093695 reference by the teachings of the Takahiro reference to use single crystal diamond base in order to ensure that the grown vapor layer of

Claims 2, 3, 5 to 11, 15 to 20, 22, 23 and 25 to 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jp 3093695 in view of Takahiro (jp 03-075298).

The Jp 3093695 and Takahiro reference are relied on for the same reasons as stated, supra, and differ form the instant claims in the dimensions of the layers and orientations. However, in the absence of unexpected results, it would have been obvious to one of ordinary skill in the art to determine through routine experimentation the optimum, operable dimensions and orientations in the combined references in order to create a uniform layer of diamond improving the properties.

Response to Applicants' Argument's

Applicant's arguments with respect to claims 1-3, 5-13, 15-23 and 25-28 have been considered but are most in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert M. Kunemund whose telephone number is 571-272-1464. The examiner can normally be reached on 8 hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571-272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
